PHILOSOPHICAL MAGAZINE LETTERS, 1990, VOL. 61, NO. 6, 359–361

SUBJECT INDEX
Vol. 61

	PAGE
AgBr, structural disorder in	349
Al-based quasicrystals	107
AlCuCo quasicrystals	15
AlCuFe alloys, icosahedral and monoclinic phases of	173
AlCuFe, icosahedral, dislocations in	125
AlFeCu, icosahedral, stability and faceting of	55
AlPd, diffusion in	21
AlPdMn, icosahedral alloys of	9
AlSiMn quasicrystalline phase	119
Aluminium-based metallic glasses	297
Amorphous boron carbide, crystalline transformation in	49
Amorphous Si, electronic structure of	161
Amorphous Si:H, carrier densities in	153
Amorphous Si:H, strain-relief spiral buckling of	281
β-Mn-type, transformation of quasicrystal to	63
Boron carbide, crystalline to amorphous transition in	49
Carrier transport from modulated photogeneration	237
Catalysis, heterogeneous, and dielectric response	231
Clusters, quantum-dot, in glasses	327
Crack growth in solids	1
Crystalline and decagonal phases, relationship between	319
Cu_3Au, order–disorder transition in	195
$CuAlO_2$, twinning in	285
Decagonal phase of FeNb and structure model	69
Decagonal and crystalline phases, relationship between	319
Deuterium in silicon, flux model of	147
Diamonds, type IaB, voidites in	341
Dielectric response and heterogeneous catalysis	231
Diffusion equation for crack growth in solids	1
Dislocation, quasicrystal, Burgers vector of	169
Dislocations in zinc oxide	83
Dislocations in icosahedral AlCuFe	125
Dislocations on surface of Tb_4O_7	269
Disorder in AgBr	349
Ductility in Ni_3Al	5
Electrodeposited NiP alloys	43
Epitaxy, solid-phase, of implanted silicon	101
FeCu and FeCu Ni, structure of precipitates in	223
FeNb decagonal phase and structure model	69
Finnis–Sinclair potentials	139
GaAs bipolar–unipolar transistor	333
Glasses, quantum-dot semiconductor clusters in	327
Grain boundaries, structural units of	91

High-resolution EM images, simulation of 29
Hole formation, nanometre, in MgO. 181

Icosahedral alloys of AlPdMn 9
Icosahedral AlFeCu, stability and faceting of 55
Icosahedral and monoclinic phases in AlCuFe alloys 173
InP, metal–insulator transition in 293
Ion-beam-deposited epitaxial silicon films. 311

Localized states in amorphous semiconductors. 77

Metal–insulator transition in InP 293
Metallic glasses, aluminium-based 297
MgO, nanometre hole formation in 181

Negative differential resistance device 339
Ni ion in cubic crystals, spin–lattice coupling for 245
Ni_3Al, ductility in 5
Ni_3Al, screw superdislocations in 259
NiP alloys, electrodeposited 43
Non-periodic objects, image simulation of 29

Octagonal phase, three-dimensional model for 305
Order–disorder transition in Cu_3Au 195
Oxide films, annealed anodic, on aluminium 133
Oxide superconductors, electrical properties of. 217

Photoconductivity of silicon-on-insulator FETs 37
Photogeneration, modulated, effect on carrier transport 237
Potentials, Finnis–Sinclair. 139
Precipitates, structure of in FeCu and FeCuNi. 223

Quantum-dot semiconductor clusters in glasses 325
Quasicrystal to β-Mn-type transformation 63
Quasicrystal dislocation, Burgers vector of 169
Quasicrystalline growth in AlPd 21
Quasicrystalline phase of AlSiMn 119
Quasicrystals of AlCuCo 15
Quasicrystals, Al-based 107
Quasicrystals, comparison with stainless steel 115

Resistance device, negative differential 339

Screw superdislocations in Ni_3Al 259
Si, amorphous, electronic structure of 161
Si:H, amorphous, carrier densities in 153, 251
Si:H, amorphous, strain-relief spiral buckling in 281
Silicon, solid-phase epitaxy of 101
Silicon, flux model of deuterium in 147
Silicon, competing growth phases in 311
Silicon-on-insulator FETs, photoconductivity of 37
Spin–lattice coupling for Ni ion in cubic crystals 245
Steel, stainless, comparison with quasicrystals 115
Structural units of grain boundaries 91
Superconductors, YBaCuO, stress-corrosion cracking in 209
Superconductors, oxide, electrical properties of. 217

Tb_4O_7, dislocations on surface of 269

Ti_3Al, yield stress of slip in 203
TiAl, antiphase domains and twinning in 95
Transistor, bipolar–unipolar GaAs 333
Twinning in ZnSe films 273
Twinning in $CuAlO_2$ 285
Twins and antiphase domains in TiAl 95

Voidites in type IaB diamonds 343

YBaCuO superconductors, stress-corrosion cracking in 209
Yield stress of slip in Ti_3Al 203

Zinc oxide, dislocations in. 83
ZnSe films, stability of twins in 273

PHILOSOPHICAL MAGAZINE LETTERS, 1990, VOL. 61, NO. 6, 363–366
